## Quotius Instruction Sheet

### **Materials:**

- 2-Page art master sheet file (PDF)
- Ruler, Exacto Knife, or Scissors

### **Step 1**

#### **Printing:**

- A) Decide what master art you will use based on your available paper stock. Letter size (8.5 X 11 in) or legal size (11 X 14 in).
- B) Choose the appropriate art sheet file that you want to use (letter or legal size) and call for your printer to “Print” page one of the file.
- C) When the sheet comes out of the printer DO NOT TURN IT OVER OR TURN IT AROUND. Just put the sheet back in the paper tray and set the printer to print page 2 of the file.

**NOTE: This is the method I use on my printer but since your printer may be different your results may not be the same.**

### **Step 2 Assembling the Quotius:**

- A) Cut out a long thin strip of paper. Use a ruler and an Exacto knife for best results or draw a line between the marks on each edge of the sheet and cut out with scissors.
- B) For further instructions watch the video: <http://mobiusman.com/3298/quotius/quotius-intro/>
